

ATTACHMENT A - MARKED-UP CLAIMS

120. A method comprising the steps of:

- identifying a plurality of securities within a substantially similar industry;
- separating the plurality of securities within the substantially similar industry into a group satisfying market capitalization criteria;
- creating an exchange traded trust having a number of outstanding shares and comprising securities within the group;
- changing the securities comprising the trust [fund] in response to changes in the securities in the group;
- trading the outstanding shares of the trust [fund] on an exchange at a real time determined price highly correlating to the securities comprising the group;
- generating at least an end of day net asset value of the trust [fund]; and,
- outputting an indication of the real time determined price in a humanly readable format.
